

Body Maintenance Solutions's Benefits in Detail

INTERIOR TREATMENT

Our Fabric and Leather Care Treatment makes for a perfect Interior Treatment for all conventional materials and leather interiors. The Interior Treatment will protect your vehicle's interior from damaging UV rays, material stains while conditioning and moisturizing your vehicle's interior.

This is not a valet service and is only intended to protect and condition the interior of your vehicle. Please keep in mind that upholstery should be clean in order for us to apply a Fabric or Leather Care Treatment. We recommend that an Interior Treatment be done when buying a vehicle and after a valet.
